Customer Testimonials

STS have been a pleasure to work with. From the offset we were impressed by their flexibility in accepting Agilent contract term with no fuss, and later agreed to reduced terms in sympathy with pay-cuts of permanent staff during the recent business downturn. We have been extremely impressed by the quality of knowledge and professionalism. It is beyond belief that we found out about STS by accident - they should be bundled in with any sale of Catapult.

Manager
Agilent technologies

"Systems Test Solutions Ltd. worked with Telefonica O2 to implement automation for NDC test cases. The project was completed well on time and within budget. We found the service to be professional, proactive and highly productive. I genuinely appreciate the efforts of all involved personnel and would highly recommend STS "

Manager
